

ZOE concept studio
line tube preamplifier

Zoe concept studio, include new design approach on high selected components

New volume control based on ladder circuit with constant impedance.

Separate power supply unit for better signal to noise ratio

Polypropylene special capacitor and copper capacitors on power supply circuit

Special Film & Foil capacitors on out signal path, just one for output

No input capacitors on signal path, selection 5 line inputs by gold plated relays with automute

Ultra low noise tube circuits with ECC-81S / 12AT 7 alternative 12BH7A or ECC802S

Chatode special optical bias control circuits

Shunt parallel power supply for HT voltage section reducing the sound power supply influence

Lateral sides panels available as cherry wood or solid black plexi

Metal remote control handset for volume control

Frequency response 20-500Khz , THD < 0.1%

General size main unit : 430 (L) x 400 (D) x 100 (H) mm ; net weight 12 Kg

Power supply size : 210 (L) x 300 (D) x 100 (H) mm

CONVENIENCE

- ⇒ **Metal remote control handset**
- ⇒ **Spikes feet**
